Journal of Engineering Mathematics

Vol. 55 Nos. 1–4 May–August 2006

A TASTE OF ENGINEERING MATHEMATICS FROM PRESENT-DAY RUSSIA

Guest Editors: Alexander Korobkin, Vladimir Erofeyev and Dmitry Indeitsev

Special Issue

A. Korobkin: A taste of engineering mathematics from present-day Russia 1–8

V.E. Saren, N.M. Savin, S.A. Smirnov, V.G. Krupa and V.A. Yudin: Hydrodynamic interaction of axial turbomachine cascades 9–39

E.V. Paryshev: Approximate mathematical models in high-speed hydrodynamics 41–64

K.E. Afanasiev and I.V. Grigorieva: Numerical investigation of three-dimensional bubble dynamics 65–80

E.L. Aero: Micromechanics of a double continuum in a model of a medium with variable periodic structure 81–95

A.G. Kulikovskii, A.P. Chugainova and E.I. Sveshnikova: On the nonuniqueness of solutions to the nonlinear equations of elasticity theory 97–110

A.G. Terentiev and V.P. Zhitnikov: Stationary two-dimensional inviscid flow with flexible boundaries including the effect of surface tension 111–126

A.A. Korobkin and T.I. Khabakhpasheva: Regular wave impact onto an elastic plate 127–150

V.A. Kovtunenko: Primal-dual sensitivity analysis of active sets for mixed boundary-value contact problems 151–166

N. Kuznetsov: Asymptotic analysis of rapid forward accelerations of a free-surface pressure 167–181

V.V. Belov, S.Yu. Dobrokhotov and T.Ya. Tudorovskiy: Operator separation of variables for adiabatic problems in quantum and wave mechanics 183–237

V. Gladyshev, T. Gladysheva and V. Zubarev: Propagation of electromagnetic waves in media undergoing complex motions 239–254

V.P. Zhitnikov, G.I. Fedorova, N.M. Sherykhalina and A.R. Urakov: Numerical investigation of non-stationary electrochemical shaping based on an analytical solution of the Hele-Shaw problem 255–276

A.N. Morozov and A.L. Nazolin: Detereminate and random processes in cyclic and dynamic systems 277–298

D.V. Balandin and M.M. Kogan: Attenuating oscillations in uncertain dynamic systems 299–312

Y.D. Chashechkin, V.G. Baydulov and A.V. Kistovich: Basic properties of free stratified flows 313–338

Ye.A. Anosova, E.N. Potetunko and Ye.N. Scherbak: Parameters of physically non-homogenous media reconstructed from the eigenfrequencies of their free oscillations 339–356
